

STATEMENT: GUEST SAFETY – CORONAVIRUS

In light of guest concern due to the Coronavirus outbreak, we would like to inform our guests that the Akti Imperial will open for the upcoming season as scheduled on April 3rd 2020, and will welcome its guests as usual. Our highest priority is the health, well-being and safety of all our guests and team members. We continue to thoroughly monitor the development of the Coronavirus around the world and follow the guidelines and recommendations of local, national, international health authorities and governments. The Akti Imperial applies exemplary sanitation procedures, as well as high hygiene and cleanliness standards. At this time, there are no reported cases of the Coronavirus in Rhodes. Rhodes has a Mediterranean climate- with mild, rainy winters and hot, sunny summers. Viral strains, such as those that cause the common cold and influenza, are less likely to spread during warmer seasons. Environmental conditions – such as high temperatures, humidity and sunlight – are a 'crucial factor' in a virus' ability to survive and infect people. Until evidence about how temperature and humidity affect transmission of COVID-19, we emphasize the importance of good hygiene practices to protect against infections.

Help Protect Yourself by Practicing Healthy Habits:

To help protect yourself against this illness and others, incorporate the following health habits into your daily routine:

- Wash your hands often. Use soap and water and scrub hard for at least 30 seconds or more. Use our alcohol-based hand sanitizer stations located around the hotel when soap and water are not available.
- Cover your coughs and sneezes with a tissue. If one is not available, sneeze into your sleeve, not your hands. Avoid touching your eyes, nose or mouth.
- Keep your surroundings clean especially when someone is ill. Clean often-touched surfaces.
- Maintain a healthy lifestyle. Stay active, get adequate rest, hydrate often and eat nutritious food.
- Avoid close contact with individuals who are sick and if you are sick, keep your distance from others to prevent them from getting sick as well.
- If you are travelling by plane, it is recommended to wipe down your tray table, arm rest and seatback displays. Once you've wiped down your seat, follow up with hand sanitizer.

And as always, if you are not feeling well, please stay home and see your primary care provider as needed. Should you already be located in our hotel, please inform our staff immediately.
